

Friendhood

Ligue de la civilisation is to perdure
the registered friendship
by homonymies and typologies
that meets the same changing personage
inseparable from the nature rhythm
in the physiological equilibrium
with artificial explorations of the mind
like between the old man and his healthy view
that cures the madness of the nil
through an antic cult
of a shared seeing with the lamp light
such a reserved vision of dropped affinities
with the young man as a slaver figure
that safeguards and helps to escape
from a social game with his own addiction
to the night dream for being an actor
inside the corporative and self freedom
of an other side of the reality
catching and building an individual proposal
of diverse attitudes to join the bodiless goal
inner a traced line of the past
that forwards new impacts
on current elements that tag the life.
