

## Diplomacy

La Ligue de la civilisation is not a political assertion  
but the federative initiative of a civil identity  
and its actors of an inherited mirror  
reflecting from men to childs  
a diplomatic custom on sea an earth  
that uses the somatic image of an archaic imaginary  
registered by memory links  
to create an equal level among languages  
for the same boyhood  
between the primitive experience of autochthonous  
and its civilized and former theory of exchanges  
like a neutral space  
that could make easier  
the preventive behaviour of contexts  
with forthcoming examples of the past.
