

Public service

La Ligue de la civilisation

wants to become the public service

for the collective lack of the same individual

in the preservation and the continuance of the work of men

and mostly into their role of contextual supports

referring to the initial theory

of a west Mediterranean experience

by the memory of the former city

between a fatherhood claim for a common substrate

and its unreachable primitivism

such an elegant tribute to the courtesan education

that don't exist anymore

but who forwards an anthropological code

for the group and for the form

as the identity reflect

of an exotic image of the east

to the same object

through a beyond of the life repertoire

where imaginary could anticipate

an obligation of the autochthonous custom

with the federative corporation of the nature rhythm

and a humanitarian progress

to blossom a refute of invisible

at the creation of new landmarks

under typologies of the past.
