

Tribute

The Ligue de la civilisation
is a tribute to all my friends
who have engaged my thought in this research
by words and silent
like a dedication to a sustainable subsidiarity
of the earth support to nature
involving sometimes to anticipate the negation of the mind
to reach the fatherhood emulation
with the cultural and anthropological group
of an art research
becoming a community linked to the last deontological dogma
of the sacred absence of the body
to an individual quest of the flesh
for meet the corporative thread
that transfers the nature on its own imitation
furthering a current opportunity of social behaviour
with the tale of an everlasting human being and his appearance
through his famous doxology of amalgamated myths
of the ferryman of the soul Charon
of the identical sexuality of Chiron
of the awareness of identity of Sciron
closing the belief to an antic fire
by an inexistent image of the loss and the reunion
of words significance
as the uninterrupted luxury of an archaic madness

that gives an access
to the prostitution theatre of an agrarian rite
under the visible escorted by the muse
who knows the significance
of underground waters
and their arising source
that conducts the contaminated origin
to a beginning of its ended time
by the image cure
of an interference with the emerging icon.
