Like a glorious epic of imaginary
the man support
to exercise a link to reality
in front of the seeing
through a tagged image
or a contemplative attitude to nature
agrees the physiological need
by enthusiast and dropped feelings
with the goal of the thought
to capture an everlasting model
that goes beyond ages
for surround his new appearance
playing with the collective quest
of an initial being
that registers by empty or full forms
the witness of a safe keeping
from the dead point of the nil
using the ambivalent experience of the truth
like a warranty to make an adequacy
with the lineal creation
that stops the social game without landmarks
and catches again its social space
for an individual invitation
to a vanity of the earth
forwarding ants behaviours under the soil

for the ashes hero
that hangs up in the sky
stars and artefacts
to make emerged the head
from the night waters of the dream.
