

I belong to you

Ligue de la civilisation
is the holy protocol of Tuscany
for the image vocation
that interferes into the social exchange
like a reciprocal return of the writing thought
to the archetypal letter of its symbolic figure
using the dispatched place
of the whole museum heritage
to extract a theoretical adventure
of the archaic and subliminal form
that preserves individual
in his contract with nature
and exalts the lack of a forwarding efficiency
to not being both the identifier and his eternal support
in the uninterrupted and structural belonging
all along the corporative and dumped life of artists
like a membership to the recovered cycle
of the same object of the art
that testifies the popularized prescription
of an existential value
inside the indo European culture set.
